Once John had got his father’s mobile to play the game.

As he got the mobile in his hand, he suddenly realised that the mobile was locked.

He went to his father and asked for mobile password to unlock the mobile. His father did not give him the password, but gave him some clues.

His father told him that the mobile password was 5-digit number. The number includes digits 6, 9, 1 and 3. Also, the password was smallest 5-digit number formed by the given digits.

Find out the password of the mobile.

Password: _____

Learning Outcome: Build and identify the 5-digit smallest number.
